

ABSTRACT

The present invention provides a drug dispenser which can push the drug in a stable state and discharge it. The drug dispenser comprises a drug case 1 for containing a plurality of drugs 100 stacked in a vertical direction, each of the plurality of drugs 100 is packed in a rectangular package with a flange 100a, and a pushing mechanism 3 for pushing out the lowermost drug 100 in a horizontal direction. A guide member 35 for supporting and guiding the flange 100a' of the second drug 100' when the lowermost drug 100 is pushed out is provided in a pushing direction of the drug 100.
